

Submitter: Kyle Parker

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: HB4145

This bill unfairly targets minorities and people of lesser means and keeps them from exercising their 2nd amendment protected, god given right.

It also allows the police to disregard rules governing the masses, and allows them protections not granted to citizens. In a world where the government is as crazy as it seems to be, striping rights from citizens should be on the bottom of the list of things to worry about. Not to mention that no state that has enacted similar laws has seen a decrease in violent gun crime because of them. These laws only hurt law abiding citizens, the one group you shouldn't have to worry about.

There is also a large portion of people who will not submit or comply, and you're creating felons of these citizens for no gain.
