Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

HB4145

This is NOT going to reduce the number of violent acts committed using firearms. As a Public School teacher who faces the possibility of an active shooter on the daily and as a teacher at a school thst has been shot three times in the 6 years I've taught there, I can safely say that what we need are robust and accessible soical services NOT unconstitutional permits to buy. This will NOT keep violet people from using guns to be violent but will make it impossible for working people to legally own guns. The history of gun control in this country is one of racism and class based violence. We need supports for struggling people NOT fees to exercise our constitutional rights.
