

Submitter:

Soheyl Kasimi

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

HB4145

Implementing restrictions technically infringes our rights to second amendment. Restrictions such as lowering magazine capacity to 10 rounds which does not mean harden criminals will abide by it but are capable getting higher capacity guns through black market to commit violent crimes especially with repeat offenders, and implementing expensive permit to purchase for future residents who wanted to arm themselves to protect themselves and their loved ones, and properties. Exercising our right to bear arms shouldn't come at a huge cost and going through complicated steps. All these restrictions will only target law abiding and responsible citizens, not criminals. We the people have the right to self-defense and/or protect others against those who commit evil acts of harm.
