

Submitter: Rob Healy

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: HB4145

I staunchly oppose these provisions. All people, especially people without the protective affiliations of law enforcement, have the right to defend themselves in a manner proportional to reasonable threats. With the AR15 platform and 15+ round striker fired handgun being the most common firearms in the USA, infringements on the right to proportional defense are infringements on fundamental rights to safety and security. These measures inordinately disadvantage marginalized and non-dominant cultures while creating more accommodations for the wealthy and dominant cultures. I'm disappointed in the direction which these laws are proceeding, especially with today's entirely unprecedented social and political turmoil. Please do not allow these, nor future provisions in the same spirit to proceed.
